

# INKVERSE™ Infinite Ink Infuser

## Gateway to the Universe of Inks

Ink Tank

Ink Cartridge

Bulk Ink Container

**Connect your inkjet system to INKVERSE™ and gain access to an unlimited ink variety and dramatic cost savings!**

Available INKVERSE™ Blade sizes:

- 760ml – Part#: IV-B0076
- 1000ml – Part#: IV-B0100
- 2000ml – Part#: IV-B0200
- 5000ml – Part#: IV-B0500
- 10000ml – Part#: IV-B1000

Precise. Economical. Reliable.  
 Environmentally Sustainable. Flexible.  
 Powered by **x-nano™** ink technology.

Works with desktop and production inkjet systems by HP, Epson, Brother, Canon, Kodak, Ricoh and more.

INKVERSE™ replaces a flood of currently in-use containers with a modular, cost saving, eco sustainable INKVERSE™ blade system for inkjets. Note: empty INKVERSE™ blades are subject to a cash redemption upon return to the supplier.

- Use INKVERSE™ blades individually or grouped together as mono or multi-color varieties using attachment points included in the packaging.
- Connect each line to INKVERSE™ Ready ink cartridges.
- Infuse a wide spectrum of x-nano™ digital inks and interconnect and build custom INKVERSE™ blade arrays.
- Connect to digital inkjet printers.
- Stack interconnected blade modules in compact groups with redundant ink variety for empty replacement during print operations.

## About INKVERSE™ Infinite Ink Infuser

### General

The INKVERSE™ Infinite Ink Infuser blade system provides an open-ended and uninterrupted ink supply to inkjet devices regardless of print head technology and performance. The system is quickly adaptable to accommodate a variety of ink types and ink/print volume requirements.

Expandable INKVERSE™ blades connect any print system from low volume desktop all the way to high-speed production presses, via a simple QuickConnect process, which is easy to install at the user level or pre-configured during system assembly.

### x-nano™ Ink Types

INKVERSE™ blades are delivered with high-performance x-nano™ ink selected from a library of dye, pigment, dye-pigment hybrid, visible, invisible fluorescent, water, solvent and energy curable inks.

### Volume Increments

The INKVERSE™ Infinite Ink Infuser blades are available in a variety of volume increments: 360, 760, 1000, 2000, 5000, 10000ml. All blades are inter-connectable, without limitation, extendable and shared for infusion of ink into existing delivery containers or directly to print head feed lines.
