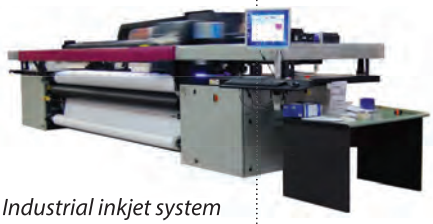
About Infinite Ink Infuser

INKVERSE™ connects with or replaces conventional bulk containers

INKVERSE™ replaces conventional one-size bulk container solutions with a modular, cost-saving, sustainable alternative for inkjet systems of any size and performance.

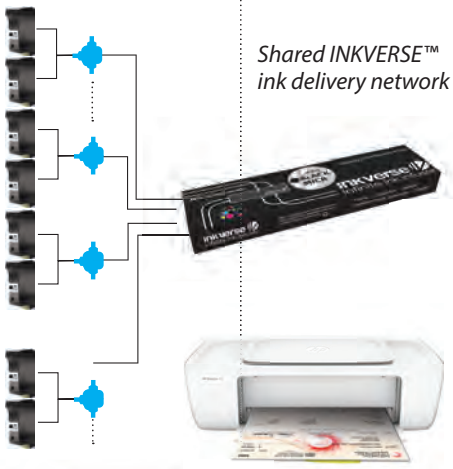
High-speed inkjet press



Industrial inkjet system

Modular INKVERSE™ Array

Shared INKVERSE™ ink delivery network



Office inkjet/ All-in-One

- Use INKVERSE™ Blades individually or grouped together as mono or multi-color varieties using attachment points included in the packaging.
- Connect each line to INKVERSE™-ready ink cartridges.
- Infuse a wide spectrum of x-nano™ digital inks and interconnect and build custom INKVERSE™ Blade arrays.
- Connect blades to TIJ 2.5 inkjet printers with large cartridge arrays 8.5" - 22" wide and using mono or multiple colors.

General

The INKVERSE™ Blade system provides an open-ended and uninterrupted ink supply to inkjet devices regardless of print head technology and performance. The system is quickly adaptable to accommodate a variety of ink types and ink/print volume requirements.

Expandable INKVERSE™ Blades connect any print system from low volume desktops to high-speed production presses, via a simple QuickConnect process, which is easy to install at the user level or preconfigured during system assembly.

x-nano™ Ink Types

INKVERSE™ Blades are delivered with high-performance x-nano™ ink selected from a library of dye, pigment, dye-pigment hybrid, visible, invisible fluorescent, water, solvent and energy curable inks.

Volume Increments

The INKVERSE™ Blades are available in a variety of volume increments: 360, 760, 1000, 2000, 5000 and 10000ml. All Blades are inter-connectable, without limitation, extendable and shared for infusion of ink into existing delivery containers or directly to print head feed lines.
